

TrucBrush®
Snow Solutions for Roadway Safety

TrucBrush®
PRODUCT BROCHURE

Safety and Savings

TRUCBRUSH® METHOD IS A SAFER, FASTER, ECONOMICAL SOLUTION

TrucBrush® addresses the transportation industry's largest winter related issue: the safe and effective removal of snow from their fleet's rooftops. The patented TrucBrush® method improves safety by eliminating the need for employees to manually clear snow from the top of a truck, trailer, bus or container. Snow on a truck, trailer or bus can cause significant hazards:

- Risk of dislodging and jeopardizing other road users' safety
- Risk of damaging trailer vehicle components
- Additional weight - roadway violations
- Risk of musculoskeletal injuries (MSI) with manually clearing
- Reduction in productivity due to clearing time

TrucBrush® easily attaches to and is powered by a front-end loader, making the service very mobile and easily outsourceable to a snow service contractor who can buy or rent

TrucBrush from an authorized TrucBrush dealer. This new

work tool allows snow service contractors to grow their businesses by providing a new service. Alternatively, a trucking or bus company can purchase or rent TrucBrush® from an authorized dealer for their in-house maintenance team to operate. Unlike other methods, TrucBrush® requires no fixed structure or expensive capital improvements.

TrucBrush® also improves operational efficiency by clearing accumulated snow and icy debris from the truck, bus or container's rooftop in approximately 30 seconds!

TrucBrush® is flexible and allows facilities with multi-height vehicles to clear snow without stopping for height adjustments for faster deployment.

TrucBrush® increases roadway safety and allows companies to meet state and provincial transportation regulations and OSHA/CCOHS guidelines.

FEATURES OF TRUCBRUSH®

EFFECTIVE

Specifically engineered for optimal clearing coverage.

FAST

Powerful hydraulic system with dual rotational operation and polypropylene bristles provide superior casting distance of snow.

FLEXIBLE

Easily accommodates any truck, trailer or bus height, including step decks, 50" flatbeds and non flat intermodal container roofs.

MOBILE

Easy assembly, easy storage, multi-season use with summer kit for sweeping.

SAFER

TrucBrush® eliminates the need for any employee to be on or near the top of a truck, trailer or bus rooftop. The all polypropylene bristles are safer on the fleet's rooftops.

fast, effective, safe new service solution

THE FLEXIBILITY OF TRUCBRUSH

TrucBrush® is flexible and handles multi-height vehicles with ease for faster fleet deployment—no adjustments for heights as each pass is a custom fit for the truck or trailer. TrucBrush® is engineered to throw the snowy debris away from the lane of operation so there is no wait time between each truck or bus clearing. TrucBrush® provides the trucking, bus and intermodal industries with a safer, faster more effective service solution.

No more manual clearing which is unsafe for employees and time consuming!

NEW ATTACHMENT OFFERING DIMENSIONS AND OPERATING SPECIFICATIONS

Manufactured with heavy gauge steel and paint finish for a lifetime, TrucBrush includes a one year Manufacturer's Warranty, info on this is available at: TrucBrush.com/warranty/

TrucBrush® easily attaches to any front-end loader brand i.e. Cat, Hyundai, John Deere, Volvo etc. TrucBrush includes a bolt-on coupler interface, the type is determined by the customer i.e. Cat Fusion, Cat IT28, JRB 416 etc. TrucBrush® is powered by the loader's hydraulic system. Requirements for TrucBrush® include:

- Loader weighs over 16,000 pounds.
- Loader has third hydraulic valve.
- Hydraulics: 30 to 40 gallons per minute

The TrucBrush® attachment weighs approximately 3,500 pounds. A fully assembled TrucBrush® measures:

Length: 14 feet, Width: 8 feet, Height 7 feet

(All dimensions are approximate.)

Easily handles multi-height vehicles

TrucBrush® Testimonials

“I’ve worked on the issue of accumulated snow on trucks and trailers in transit for twenty years. TrucBrush is a really innovative approach and one answer to what the trucking industry has been looking for to address the concern.”

Mike Riley, Former President
Motor Transport Association of
Connecticut

“TrucBrush has helped our organization differentiate itself from other contractors and gain new clients. Last year, we were awarded a large airport freight facility because of our introduction of TrucBrush services. We look forward to purchasing more TrucBrush units.”

Mark J. Aquilino, President Outdoor
Pride

“TrucBrush has been a pivotal component to our fleet when dealing with a New England winter. The savings we have gained by not losing down time has made this investment worth it.”

Jarod Warsofsky, General Manager
Boston Trailer

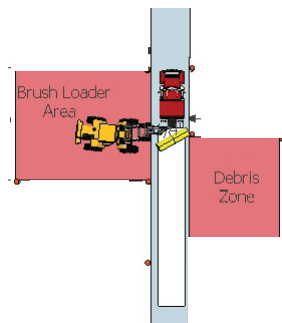

TrucBrush® Recognitions

In 2016, the national Snow & Ice Management Association (SIMA) awarded TrucBrush with the **Snow Industry Commitment Award** for innovation and outstanding support and customer service. Only one company receives this award annually.

TrucBrush Corporation received a Smaller Business of New England (SBANE) **Innovation Award** in 2016. Past winners of the SBANE Innovation award include notable companies such as Ben & Jerry’s, Direct Tire, Genzyme, Staples and Zipcar.
